

Generative AI framework

Why GenMS™?

GenMS is Management Solutions' framework for building, testing and deploying **Generative Artificial Intelligence (GenAI)** tools.

Developed from the experience and knowledge accumulated by the Firm, this framework offers a comprehensive approach, from design and technological implementation to validation and regulatory compliance, to ensure that advanced and reliable solutions in the field of Generative Artificial Intelligence are achieved with great agility.

GenMS provides answers to the key challenges faced by all industries in relation to Generative AI and LLM, making it possible to:

- ▶ Customize GenAI solutions to optimize business processes.
- ▶ Effectively integrate GenAI with existing infrastructure and data.
- ▶ Leverage knowledge from previous GenAI projects.
- ▶ Develop and deploy GenAI applications.
- ▶ Comply with emerging GenAI regulations or existing regulations such as the AI Act.
- ▶ Test and validate GenAI use cases.

Management Solutions has designed the **GenMS** framework to enable the development of **GenAI** use cases, accelerate time to market, and ensure regulatory compliance

GenMS™ Outreach

GenMS components are useful in all phases of building a GenAI system: design, development and deployment. In each of these phases, **GenMS** can add value to the activities and processes listed below.

Design

- ▶ Functional definition and conceptualization of a use case based on the developed minimum viable product (MPV).
- ▶ Identifying, selecting and configuring the necessary technological resources.
- ▶ Technical design for system development and production.

Development

- ▶ System and application construction, based on front-end components and GenMS codes.
- ▶ Testing and evaluation, based on GenMS ATLAS.
- ▶ Checking compliance with the AI Act and documentation.
- ▶ Configuration and preparation for deployment to production.

Deployment

- ▶ Integration with existing processes and tools.
- ▶ Scaling users and resources while monitoring performance and minimizing costs.
- ▶ On-premise, private cloud or SaaS deployment in Management Solutions' private cloud.

GenMS™ features

The solutions created within the GenMS framework have the following characteristics:

- 01 Customization**
Tailored to the customer, incorporating the necessary expertise within the solution.
- 02 Accuracy**
Precise, combining the different state-of-the-art techniques in the field of language modeling.
- 03 Quantification**
Quantifiable results, since their impact on the business can be easily measured in terms of time savings or other KPIs.
- 04 Efficiency**
Efficient to develop and deploy, minimizing technology infrastructure costs.
- 05 Flexibility**
Flexible deployment (cloud or on-premise).
- 06 Scalability**
Scalable, thanks to our experience and partnerships with leading cloud providers.
- 07 Compliant**
Compliant with regulations, including the AI Act.

Components of the GenMS™ framework

Front-end components

Pre-compiled, customizable and reusable user interface elements that ensure a consistent look and feel across all tools and a fast time-to-market.

Code libraries

Optimized, robust and reusable back-end components developed in-house and combined with open source.

Knowledge repository

Collection of best practices and most commonly used techniques:

- Prompt engineering.
- Retrieval augmented generation (RAG).
- Knowledge graphs.
- Multi-agent system.

Secured multi-cloud

Highly secured development and deployment options on Amazon Web Services, Google Cloud or Microsoft Azure, protecting sensitive data.

Language models (LLMs)

Proprietary: Gemini, GPT-4o, Claude.
Open-source: Mistral, Llama, Gemma, Vicuna, Phi, SeamlessM4T, etc.

Compliance by-design

Solutions are designed to pass all tests defined in GenMS ATLAS (Advanced Testing of Language AI Systems), and to comply with AI regulations (as a reference to the AI Act) from the start.

GenMS™ is a robust and complete framework for developing GenAI systems, and its components can be used to accelerate projects in all types of organizations.

GenMS™ use case reference

Management Solutions has extensive capabilities and references in the GenAI field, combined with a deep understanding of technology and business processes.

Thanks to **GenMS**, Management Solutions has developed use cases in the areas of process automation, information analysis and extraction, and decision support. Below are some examples of use cases implemented at our clients:

Process automation

Astronomer

GenMS Astronomer enables webscrapping of regulatory and supervisory websites, searching for relevant changes in the regulations published on those websites. It also writes summaries of the identified updates and tags them for further filtering.

Veritas

GenMS Veritas is a document analyzer that allows you to compare the legal clauses of a contract with internal general terms and conditions, and identifies discrepancies between the two.

AI Act Checker

GenMS AI Act Checker is a form that generates the regulatory requirements that an artificial intelligence (AI) system must meet in accordance with the AI Act.

Sentinel

GenMS Sentinel is a tool that assigns a qualitative credit rating to a company based on the information provided about it.

Dialect

GenMS Dialect is a translator that converts SAS programming code into Python programming code.

Explainer

GenMS Explainer es una herramienta que predice la pérdida de clientes, recomienda la mejor oferta en función del perfil de cada cliente y explica cada recomendación para facilitar la comprensión y la toma de decisiones del usuario.

Analytics and information extraction

Analyst

GenMS Analyst is a multi-agent conversational chatbot that allows users to ask questions about the content of a database using natural language without the need for expert technical knowledge.

Intelligence

GenMS Intelligence is a chatbot that allows you to ask questions about internal policies and procedures. It also allows you to ask questions about PDFs and search the web.

Saluto

GenMS Saluto is a CV analyzer for extracting information and storing it in a structured database so that it can be processed later.

Renovatio

GenMS Renovatio is a version control tool that allows you to compare two versions of the same document. Its purpose is to quickly find significant differences between an updated version and an old version of the same document.

Insight

GenMS Insight is a chatbot aimed at employees for consulting manuals on Jira, aimed at providing support in the process of adopting Jira Software Server.

Aurora

GenMS Aurora is an application designed to analyse corporate news and databases, retrieving relevant risk drivers for specific companies and generating a risk score, which can be integrated into an Early Warning System (EWS).

Decision support

AuditEase

GenMS AuditEase is a wizard for drafting audit recommendations and audit reports based on a set of pre-defined findings.

Starlight

GenMS Starlight is an audit findings generator that compares the documentation of a process with the applicable regulations, identifies findings and classifies their severity.

Scarlet

GenMS Scarlet is a model validation assistant that identifies validation findings based on the model documentation, internal validation guidelines and applicable regulations.

Eventum

GenMS Eventum is a detector of events that have occurred, obtained from real-time news. Eventum is aimed at the re-planning of routes in a logistics company.

Atlas

GenMS Atlas is an application designed to partially automate the testing and validation of LLM-based applications.

Consilia

GenMS Consilia predicts customer churn, recommends the best offer based on each customer's profile and explains each recommendation to support user understanding and decision-making.

Management Solutions

A leading business consulting firm

Management Solutions is an international consulting Firm focused on consulting for business, risks, organization and processes, in both their functional components and in the implementation of their related technologies.

Management Solutions Management Solutions currently has a multidisciplinary team (functional, mathematical, technical and systems integration) of 4,000 professionals, and operates through 50 offices (in Europe, Americas, Asia, Africa and Oceania) where we serve customers operating in more than 50 countries.

Management Solutions' differentiating factor lies in its in-depth knowledge of the businesses in which its clients operate and in its high degree of sector-specific and functional specialization.
