General overview of FIDA

Executive summary

In June 2023, the European Commission (EC) presented a legislative proposal for a regulation on a framework for financial data access (FIDA)

Context

- In 2015, with the second Payment Services Directive (PSD2), it was introduced the **Open Banking** in the EU.
- On **June 2023** the EC published a package that revises PSD2 (PSD3) and that introduces a new Regulation on a Framework for Financial Data Access (FIDA) which goes a step further and introduces 'Open Finance' by enlarging the scope of data that customers may allow to share and open the door to new types of services and business models in the financial industry. All financial institutions are subject to FIDA.

Relevance of this regulation

- This framework, in practice, this will lead to **more innovative financial products and services** for users and will stimulate competition in the financial sector.

Next steps

- This proposal shall be accepted by the European Parliament (EP) and the Council.
- The Proposal will enter into force on the twentieth day after its publication in the Official Journal of the European Union (OJEU), following its application **24 months** after the entry into force. However, articles related to financial data sharing schemes, application for authorization of financial information service providers and legal representatives will apply **18 months** after the entry into force.

2 | PSD3/PSR vs FIDA vs DMA Comparison

The EU is seeking to create a single market for data, therefore, in recent years various sectoral regulations have been adopted to facilitate this single market

	PSD3/PSR	FIDA  (1)	Digital Markets Act (DMA)
Classification	Open payments	Open finance	Open data
Data	<p>This Directive lays down rules concerning:</p> <ul style="list-style-type: none"> • Access to the activity of providing payment services and electronic money services, within the Union, by payment institutions • Supervisory powers and tools for the supervision of payment institutions 	<p>This Regulation applies to the following categories of customer data:</p> <ul style="list-style-type: none"> • mortgage credit agreements, loans and accounts, except payment accounts including data on balance, conditions and transactions; • savings, investments in financial instruments, insurance-based investment products, crypto-assets, real estate and other related financial assets • pension rights in occupational pension schemes and on the provision of pan-European personal pension products; • non-life insurance products, with the exception of sickness and health insurance products; • data which forms part of a creditworthiness assessment of a firm which is collected as part of a loan application process or a request for a credit rating 	<p>Data generated by the use of the platform, always with the prior consent of the user</p>
Data holders	Account servicing payment services provider (ASPSP)	Credit institutions; payment institutions; electronic money institutions; investment firms; crypto-asset service providers; issuers of asset-referenced tokens; managers of alternative investment funds; management companies of undertakings for collective investment in transferable securities; insurance and reinsurance undertakings; insurance intermediaries and ancillary insurance intermediaries; institutions for occupational retirement provision; credit rating agencies; crowdfunding service providers; pan-European Personal Pension Product (PEPP) providers	Gatekeepers that offer or provide core platform services (the only ones are: Alphabet, Amazon, Apple, Byte Dance, Meta Platforms, Microsoft Corporation)
Data users	Third Payments Service Providers (TPSPs)	Financial Information Service Providers (FISPs) and data holders	Service providers in the digital sector where gatekeepers are placed

FIDA main content Sections and characteristics

This proposal seeks to establish a framework governing access to and use of customer data in finance

Data access

The data holder shall, upon request from a customer submitted by electronic means, **make the data within the scope of this regulation** (e.g., mortgage credit agreements, loans and accounts data) **available to the customer without undue delay, free of charge, continuously and in real-time.**

The customer has the right to **request that the data holder shares this data with a data user.** Data should be used only for the purposes and the conditions agreed with the customer.

A data holder **may claim compensation from a data user for making customer data available** only if the customer data is made available to a data user in accordance with the rules and modalities of a financial data sharing scheme.

A data user shall only be eligible to access customer data if **that data user is a financial institution or has been authorized as a Financial Information Service Provider.**

A customer may **withdraw the permission** it has granted to a data user.

Responsible data use

A data holder shall provide the customer with a **permission dashboard to monitor and manage the permissions** a customer has provided to data users.

The data holder shall ensure that the permission dashboard is **easy to find in its user interface** and that **information** displayed on the dashboard **is clear, accurate and easily understandable** for the customer.

The data holder and the data user for which permission has been granted by a customer shall **cooperate to make information available** to the customer via the dashboard in real-time.

This proposal seeks to establish a framework governing access to and use of customer data in finance

Financial data sharing schemes

Within **18 months** from the entry **into force** of this Regulation, data holders, data users and customer associations and organisations shall become **members of a financial data sharing scheme** governing access to the customer data, and they may become **members of more than one** financial data sharing schemes.

The financial data sharing schemes shall include among others; i) the members; ii) the rules applicable; iii) the membership rules; iv) a mechanism through which its rules can be amended; v) rules on transparency.

In the event that a financial data sharing scheme is **not developed** for one or more categories of customer data and there is no realistic prospect of such a scheme being set up within a reasonable amount of time, **the Commission is empowered to adopt a delegated act** to supplement this Regulation by specifying the modalities under which a data holder shall make available customer data.

Eligibility for data access and organization

A financial information service provider shall be **eligible to access customer data if it is authorised by the CA** of a Member State and shall submit an application for authorisation to the CA, including among others:

- i) a programme of operations setting out in particular **the type of access** to data envisaged;
- ii) a business plan including **a forecast budget calculation for the first 3 financial years** which demonstrates that the applicant is able to employ the appropriate and proportionate systems, resources and procedures to operate soundly.

4 | Why Management Solutions?

Management Solutions has an extensive experience in Global Markets and Transactional Banking, with several success cases in the development of projects related Open Banking Regulations and Use Cases

1. **Matrix organization** (client, industry, competency and geography) that supports knowledge management and has a **global R&D team**.
2. **Specialised team**. MS has more than **400 professionals** with a deep understanding of the **Global Markets and Transactional** activity, with a high degree of expertise in analysis and implementation of specialised solutions.
3. **Leading Consultant** in **Wholesale** and **Transactional Banking**. Privileged perspective of the **participants and characteristics** of local and global markets as a result of its intense activity as professional consulting services provider working for the **leading entities** in the sector (with over 900 local and global clients).
4. **Differentiated track record**. Record of success cases in the execution of projects related to **Open Banking**, with experience in strategic business planning, business model definition, technical implementation, API Governance, and regulatory compliance.
5. **Deep understanding of Open Banking Regulatory Framework**. In depth knowledge of international regulations related to **Open Finance**(PSD2/PSD3, FIDA, Fintech Law (MX), Brasil's Joint Resolution on Open Banking, Fintec Law (CH)...)
6. **Close relation** with leading institutions covering Open Banking, including the association with **Open Finance UK** in the elaboration of the "[Exploring Open Finance](#)" report.
7. **Experience with regulators and supervisors**. MS is a "highly qualified external service provider" to international and national central banks.
